

Backend Coding Standard

Coding Standards

Indentation and Spacing:

- The tab size is set to 4 spaces.
- Always use spaces instead of tab characters for indentation.

Formatting:

- Code formatting is governed by the "Black" code formatter.

Naming Conventions:

- Types, interfaces, and classes: Use CamelCase.
- Functions and variables: Use snake_case.
- Constants: Use PASCAL_CASE.
- Folder and file names: Use snake_case.

Project Structure:

- Adhere to the default structure provided by Django.

Testing:

- All unit tests should be placed within the `tests.py` file.
